

Kyriba for Healthcare

Advanced Treasury and Connectivity Solutions for Healthcare Providers, Hospital Systems, and Healthcare Organizations

Kyriba delivers trusted treasury, payments and connectivity solutions for Healthcare organizations—covering hospitals, health systems, clinics, long-term care facilities, and specialty healthcare providers. Our secure cloud platform centralizes cash visibility, automates workflows, and provides actionable insights to optimize working capital and support exceptional patient care delivery.

Why Healthcare Organizations Choose Kyriba

- Solves multi-entity cash management, reimbursement delays, and M&A integration complexity.
- Provides Healthcare-specific analytics designed for revenue cycle volatility, payer performance patterns, and multi-facility operations.
- Demonstrated 415 hours monthly productivity gains, \$2.8M annual savings, and 4.9-month ROI payback period.
- Delivers continuous innovation in AI, API, automation, and treasury digitalization with complete data sovereignty.

What Sets Us Apart

- Unmatched system integration with connections to 9,900+ banks, major EHRs (Electronic Health Record systems such as Epic, Cerner, and Meditech) and ERPs (e.g., Oracle, Netsuite, Microsoft Dynamics 365, and SAP).
- 3 billion bank transactions and \$15 trillion in payments processed across the globe annually, with proven healthcare transformation results and M&A integration expertise.
- Industry's only Trusted AI architecture with embedded LLM technology and Agentic AI (TAI), ensuring complete data sovereignty for sensitive healthcare financial information.
- Comprehensive working capital optimization with receivables finance, dynamic discounting, and healthcare-specific payment solutions.

Industry Stats

415

hours saved per month by healthcare customers using Kyriba.

76

Hours saved per month on daily cash positioning by healthcare customers using Kyriba.

51%

Average reduction in idle cash balances by healthcare customers using Kyriba.

Solving Healthcare Challenges

- Multi-entity cash visibility across all facilities and locations with AI-driven forecasting for reimbursement cycles and payer performance patterns.
- Seamless EHR integration (e.g., Epic, Cerner, and Meditech); automated reconciliation eliminating up to 95% of manual processes.
- Accelerated revenue realization with receivables finance and dynamic payment optimization designed for healthcare cash flow patterns.
- Multi-layered security with SOC 1, SOC 2, and SOC 3 Type II reports, complete data sovereignty, and enterprise-grade protection for patient financial information.
- Rapid M&A integration with 90% reduction in facility integration time, supporting healthcare consolidation and growth strategies.

Use Cases and Impact

Hospital Systems

Multi-facility cash management,
M&A integration,
revenue cycle optimization

Healthcare Networks

Multi-entity consolidation,
payer performance analytics,
working capital acceleration

Specialty Providers

Reimbursement forecasting,
compliance automation,
cash flow optimization

Key Benefits Summary

Consolidated view of cash, liquidity, and reimbursements across all facilities, entities, and payer relationships.

Automated payments, reconciliations, working capital optimization, and revenue cycle forecasting.

AI-powered scenario analysis with natural language processing for strategic healthcare decision-making.

Connect to 9,900+ banks globally and major ERP platforms with pre-built connectors.

Comprehensive M&A integration capabilities supporting rapid facility consolidation and operational synergies.

Advanced protection for healthcare data with complete audit trails and role-based access controls.

Compliant with all applicable United States privacy regulations and EU GDPR; Data Privacy Framework (DPF) Certification from the U.S. Department of Commerce.
