

Bridging the Gap Between Your ERP and Global Banks

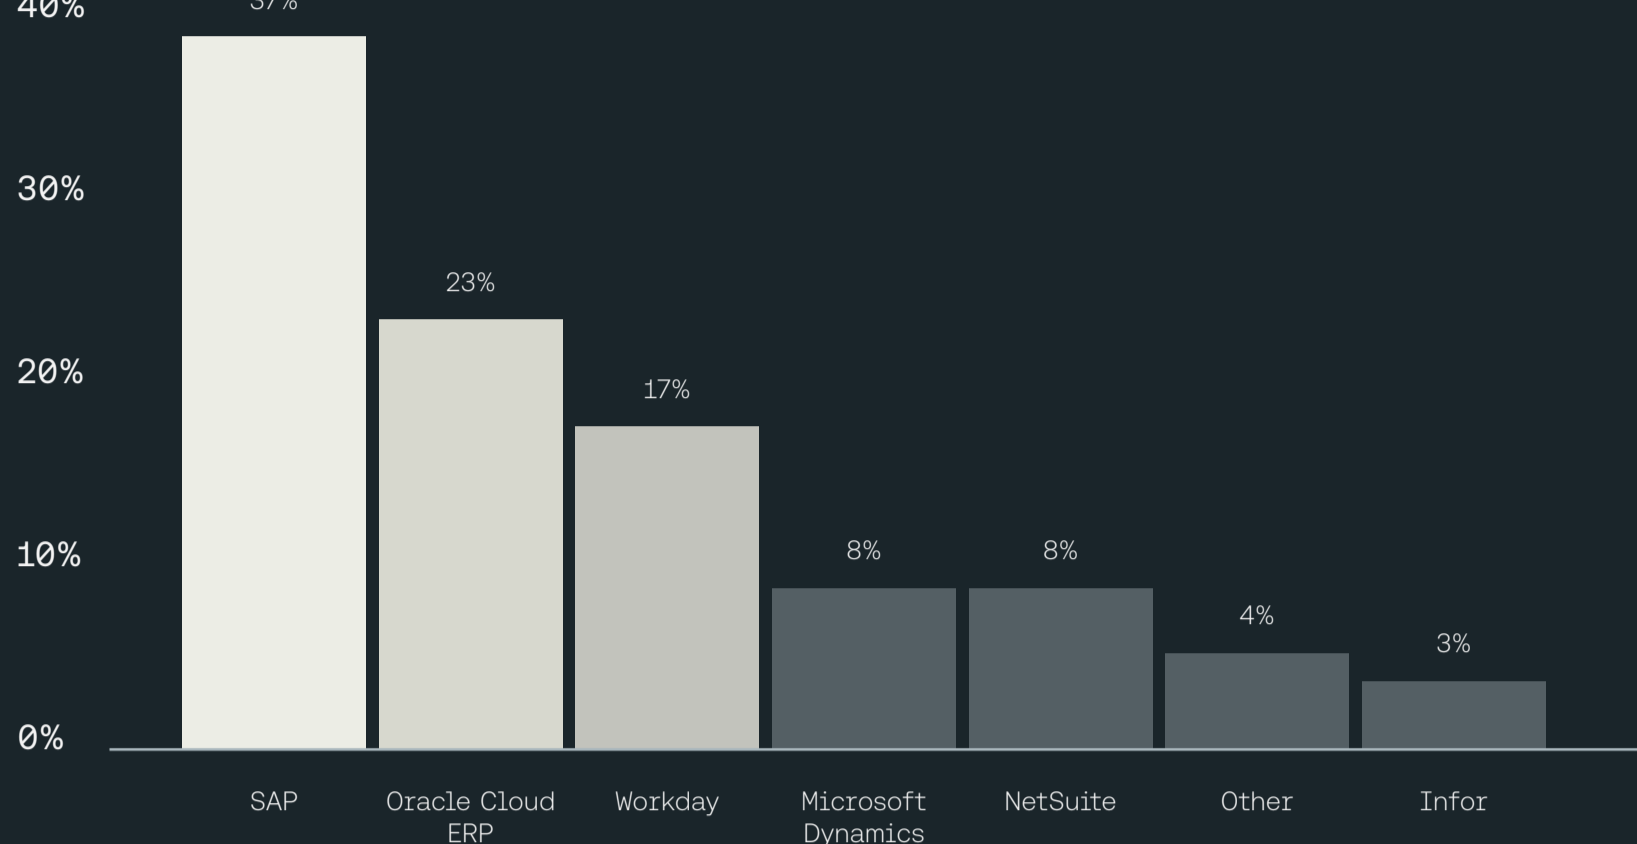

IT teams looking to connect global banks to their enterprise resource planning (ERP) system often find—too little too late—that the initiative is more challenging than it should be. Localization and different global banking formats can bog down these teams, which is why many are outsourcing bank ERP connectivity to technology partners.

Kyriba and Pulse surveyed 100 IT leaders to shed light on how technology can simplify the process of connecting your ERP to global banks.

IT Leaders Find That Connecting Their ERP Systems to Banks Is Neither Straightforward nor Risk-Free

The top three ERP systems IT leaders say their companies rely on are SAP (37%), Oracle Cloud ERP (23%), and Workday (17%).

What ERP System Does Your Company Currently Use?

No matter what ERP system they use, **91% of IT leaders agree** that connecting banks is one of the most complex aspects of an ERP project.

Do You Agree That Bank Connectivity is One of the Most Complex Aspects of a Global ERP Project?

• **82%**
Agree

• **9%**
Strongly Agree

• **9%**
Disagree

Variety of Global Banking Formats Demand Additional Resources from IT Teams

The biggest struggle of the ERP bank connectivity process that most (56%) IT leaders cite is handling different global banking formats, followed by the direct integration process itself (25%).

What Aspect of the ERP and Bank Integration Process Is the Most Resource-Intensive for Your Team?

- Understanding the complexity and changes in global banking formats
