

# The Kyriba and BlackLine Partnership

KYRIBA FACT SHEET

## Greater Integration, Connectivity and Reporting with Kyriba and BlackLine

**Kyriba and BlackLine are partners delivering customers greater cash visibility and reporting capabilities from the bank all the way to the general ledger. Our customers benefit from this partnership through enhanced, automated bank and treasury reporting delivering access to better information.**

Kyriba connects BlackLine customers directly to over 1,000 banks via leading technology to include an award-winning Open API platform. Visibility to connectivity, bank reporting and status reports are all easy to access via our dashboards and widely used Connectivity Cockpit.

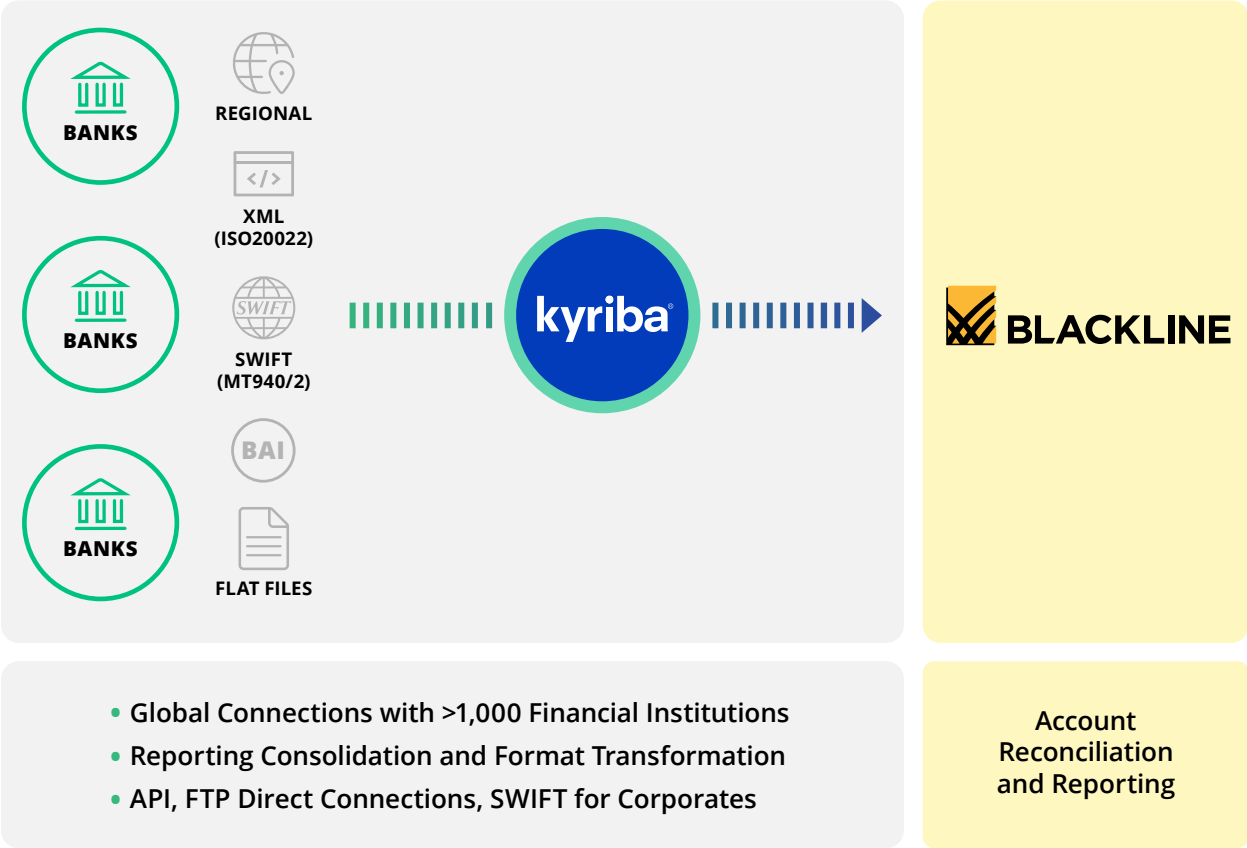

Regardless of industry, size or geographic scale, Kyriba and BlackLine integrations help organizations of all sizes streamline and speed projects for cash visibility, bank reporting and ERP upgrades or migrations.

The Kyriba-BlackLine partnership and collaboration helps our customers adapt and respond to the changing bank landscape through the latest technology and integrations for cash and liquidity reporting.

### Partnership Value

- Bank Connectivity Network
- Format Standardization and Transformation
- Cash and Liquidity Reporting
- Accounting, GL and Financial Reporting Automation
- Reduce implementation and ongoing IT costs associated with one-off bank integrations

# KYRIBA - BLACKLINE INTEGRATION

## Cost Reductions, Value for Your Organization

The traditional treasury environment is very IT dependent with highly customized code bases which are not only costly, but also difficult to scale.

Kyriba’s multi-bank, connectivity-as-a-service offers extensive bank connectivity as a managed service (Connectivity as a Service) with great reductions in implementation and ongoing IT costs. In fact, Kyriba’s capabilities around payments has, on average, saved customers over 120 hours per month.

**Speeds Project Timelines**

**Annual Savings Up to \$96K Per Bank Connection**

**Reduces Burden on IT**
